## PROFESIONAL PROFILE

Frontend Developer who, since July 2025, has been responsible for the user interface aspect of migrating a cooperative's system from CodeIgniter 4 to a separate React + Golang architecture, as well as developing a village/subdistrict cooperative portal and an Android app for Islamic boarding schools. Proficient in React, TypeScript, and Tailwind CSS; experienced in consuming REST APIs and collaborating with backend teams. Graduate of Computer Science (GPA 3.52/4.00).

## EDUCATION

**Pamulang University** (September 2021 – July 2025)

**Bachelor of Computer Science – Computer Engineering** GPA: **3.52**/4.00

## WORK EXPERIENCE

**Frontend Developer | PT Solusi Digital Partner** (July 2025 - October 2026)

- Migrated the cooperative dashboard from CodeIgniter 4 to a separate React + Go architecture as a frontend developer, utilizing a Go-based REST API for transactions, member data, and financial reports.
- Built a single-page application (SPA) for a village/subdistrict cooperative portal using React, TypeScript, and Tailwind CSS, featuring an interactive statistics dashboard, charts, dynamic tables, and reusable UI components.
- Developed the frontend for a mobile app for boarding school guardians using React Native, featuring student card balance top-ups, bill payments (monthly tuition, building fees), and e-commerce for boarding school products.

## PROJECT EXPERIENCE

**System Inventory & Management Stock** *ReactJS, TypeScript, Vite, TailwindCSS, ExpressJS, Prisma*

- Develop an end-to-end web-based inventory system (frontend and backend) with a separated architecture.
- Build an interactive analytics dashboard to monitor inventory levels, categories, suppliers, and inventory movements.
- Develop a REST API using Express.js and Prisma, along with authentication featuring role-based access control.

**Web Booking System Rental Outdoor Equipment** *ReactJS, TypeScript, Vite, TailwindCSS*

- Design and develop a conversion-focused landing page for an outdoor equipment rental business.
- Implement an automated booking workflow with WhatsApp integration as the primary transaction channel.
- Design the user experience (UX) to efficiently guide users from product exploration through the booking process.

**Archistruct: Website Company Profile Arsitektur & Konstruksi** *ReactJS, TypeScript, Vite, TailwindCSS*

- As a front-end developer, I built a company profile website for an architecture and construction firm, showcasing the company profile, services, project portfolio, and contact information in a responsive interface optimized for both desktop and mobile devices.
- I implemented a portfolio gallery, project detail pages, and transition animations to visually showcase the company's work.

---

**TECHNICAL SKILLS**

- Frontend: HTML5, CSS3, JavaScript (ES6+), ReactJS, TypeScript, TailwindCSS, Bootstrap
- Backend: ExpressJS, PHP, Laravel, CodeIgniter
- Database: MySQL
- Others: Git, GitHub, Vite, REST API, Postman, Figma

**PERSONAL SKILLS**

- Has experience leading and managing small to medium-sized projects.
- Accustomed to working with strict targets and deadlines.
- Able to organize work priorities and manage time effectively.
- Able to adapt quickly to changing needs and team dynamics.
- Experienced in working collaboratively on cross-functional teams.

---

## TRAINING & CERTIFICATION

**VSGA (Vocational School Graduate Academy) – KOMINFO** (July 2024 - August 2024)
**Junior Web Developer**

- Learning web development from both the front-end and back-end perspectives.
- Gaining in-depth knowledge of HTML, CSS, JavaScript, PHP, MySQL, and Bootstrap.
- Implementing CRUD (Create, Read, Update, Delete) concepts in data management.
- Using Git for version control and team collaboration. Adhering to responsive design standards and cross-browser compatibility.
- Creating a final project in the form of an interactive website with data management features connected to a database

**Uji Kompetensi Skema Programmer – Universitas Pamulang & BNSP** (July 2024 - July 2024)
**Programming Schemes**

- Passed the Junior Programmer certification (BNSP standard)
- Proficient in programming fundamentals, debugging, and clean code
- Implemented CRUD operations and MySQL database integration
- Built a responsive web app using Bootstrap
